

# BBAR Fused Silica 400-800nm

Note, minimum reflectance achievable is <0.5% per face 1% total

Illuminant: WHITE                      Angle:            0.0 (deg)  
Medium:        AIR                        Reference:       550.0 (nm)  
Substrate:    SIO2                            Polarization: Ave —  
Exit:          SIO2                        First Surface: Front  
Detector:     IDEAL                      Remark: Four-Layer Coating
