# X-ray Source Innovation

Torr Scientific has recently completed a Knowledge Transfer Partnership with The University of Surrey. This resulted in enhancing knowledge and processes within the company for thin-film coating of CVD diamond X-ray anodes. There is increasing interest in the company's 'densified' anode coatings in both XPS and XRF applications.

# Register Now!

Tec 66
Hastings Vacuum & Technology Industry Cluster

Please register now to visit the TEC66 Vacuum Technology exhibition and conference taking place for the first time in Hastings on Monday 16th September to promote the many high-tech companies in the industry located and doing business in Hastings and East Sussex.

# 1066 Award

Torr Scientific attended the 1066 Business Awards 2013 in July and received a highly commended award for investment in training.

# Viewport Team

Torr Scientific is delighted to have introduced Tim Andrews to the team of cleanroom technicians to oversee growing UHV viewport production. Tim has gained significant experience in the handling of glass components manufactured for the UHV industry. Tim is pictured on the left supervising the preparation of a vacuum furnace run of fused silica windows.

# 15th Birthday

Torr Scientific is celebrating its 15th year of trading. Managing Director David Bates who established the business in 1998 looks back on the development of the company with lasting memories. 'My fondest moments have been when travelling on business to some exciting locations; I particularly enjoyed a trip to San Francisco to exhibit at the American Vacuum Society Exhibition in 2008. After riding out two deep economic recessions our greatest achievements have been not only to remain in business but to sustain significant growth whilst assembling a team of committed hardworking employees who share my vision.'
