- Aerospace Vacuum Optics
- X-ray Anodes
- In-Line Monochromator (ILM)
- Synchrotron Products
- Electron Optical Components

Please Welcome Our New Business Development Manager

Phil Marston joins Torr Scientific as its new Business Development Manager. Phil has spent over 35 years in the vacuum industry, he started as a technician in 1983 working at Vacuum Generators developing and testing new vacuum products, then moved into sales and marketing. Since then he has worked for several other large vacuum companies including MDC & Nor-Cal whilst covering territories in the UK, Europe, USA, Russia, & Japan. Phil sees moving to Torr as a great opportunity, he says: "there is a wealth of untapped experience in coating & sealing technology at Torr, my job is to look at new territories and to let the marketplace know about what Torr can offer". Phil will also develop the company's export distribution, key accounts and oversee future marketing plans. Please don't hesitate to contact Phil via email on sales@torrscientific.co.uk.

High Quality Zero Length Kodial Glass Viewports
