

Torr Scientific Ltd requires a **Machine Shop Engineer** to run the new CNC/manual MDM-100 mill and MDL-1800 lathe in its expanding machine shop, manufacturing product components, prototypes and tooling.

The successful candidate will have experience of both CNC and manual milling and turning of metals, with the confident ability to interpret manufacturing drawings and measure to tight dimensional tolerances; some welding experience, or an interest in undertaking TIG welding training, would also be advantageous. Candidates should be conscientious with a keen eye for detail and a strong team work ethic.

Applicants should email their CVs and cover letters to i.mcglashan@torrscientific.co.uk.
